

AT HIGHFIELD WE LISTEN.....

Over-grown greenery and litter.

We continually trim all shrubs, bushes and overhanging trees on the school site to ensure that public foot paths are clear and safe for passers-by and for the residents.

We teach our children about looking after our neighbourhood and to throw their rubbish in a rubbish bin. Following a request from local residents our site staff have also been litter picking in Farm Road

Highfield Children helping in the Community

A resident is a volunteer at the local hospice, she asked us to contact the hospice. From this conversation we have formed a link with The North London Hospice in Barrowell Green. The Choir have been there and performed, they have also shared stories with the patients....then our brilliant partnership began!

North London Hospice

Our school council worked with staff and patients of the hospice along with our resident poet Cheryl they produced some wonderful work including some insightful poems on memories.

Both children and the hospice staff and patients learnt a great deal from this joined up working project. This link will continue.

Dangerous parking

We have continued to raise awareness on dangerous parking to our families and are holding them to account of their illegal actions. We are also working with the traffic police to support our plight. The safety of the children is paramount. We are texting families and adding our safety concerns in our website and in our newsletter.

We are working with residents and sign posting them to appropriate authorities that will deal with illegal and irresponsible parking.

TO THE COMMUNITY

Request for information about the school.

We alert the residents of Highfield Road of any immediate functions that will impact on them and have made them aware of the school website for further information.

Volunteers

Many Parent, carers and residents volunteer their time and come into the school to hear children read. The time given by these adults is very worthwhile and really helps the children in their learning, we are most grateful. Many go on to gain qualifications to become TAs and some have been employed at the school.
