

Year 3 Easter Activity Ideas

Helping the community from your home.

Everything will feel different, being at home all day. There are lots of ways you can connect with other people though. Children all over the country have been painting/drawing rainbows and placing them in their windows for everyone to see.

Can you see any rainbows outside where you live? Why don't you create a bright picture to put up in a window or around your home to put a smile on someone's face 😊

You can keep up to date with what's going on around the world and all the good news by watching CBBC Newsround each day.

<u>Science:</u>

Our next topic in Science is looking at the human body and healthy diets.

- Research the human body, focussing on the skeleton. Why are bones important? How can we keep our bones strong and healthy? Why do we need bones/a skeleton?
- For healthy diets, think about all the different food you eat. Has anyone ever said it wasn't good to eat too much of it? Think about what foods we have to be careful we don't eat too much of. Make a list of healthy and unhealthy foods.
- Design a plate made up of your favourite foods, you could cut out pictures from old magazines/ newspapers to create a fun plate or draw them.

• Can you design a healthy plate to eat? Think about who you are making the healthy meal for; is it someone in your family? Is it an athlete? Is the person young or old?

Religion:

This time of the year is known as Easter, it is a Christian celebration. Do you know anything about it already?

- What is the story of Easter? Create a storyboard with drawings and sentences about the story.
- Create a poster about what Easter is. What information do you need to include?
 - * Why do Christians celebrate Easter?
 - * How often is it celebrated?
 - * What is the story of Easter?
 - * Why do Christians celebrate Easter?
 - * What is the significance of Easter eggs?

Keeping Fit:

• Have you heard about the PE lessons with Joe Wicks? Have you done any of them? Give one of his workouts a try; he uses names for some of his exercises to make them fun like; 'kangaroo jumps, spiderman, surfer man and karate kicks!

• Create an obstacle course, using objects around the house. Persuade a sibling or grown up to do it with you, time yourself! Look at these pictures to give you ideas 🗇

Art and Crafts: If you could invent anything what would it be? Draw what you would invent and label it.

Extended tap for kids Tool to get crisps out of the tube

- Can you use any recyclables around the house to create something with a function? Look at these examples:

Table top football using Instruments made from real hox and stray astic bands and iar lids.

Pegs, bottle lid to create a

• Think back to our work on Seurat, he used pointillism. Can you create your own piece of pointillism, drawing something in your house or outside your window?

History:

Think back to our History topic of the Ancient Egyptians. What can you remember?

- Create a poster or make a fact book about the Egyptians, can you remember names of any Gods/Goddesses? What are they remembered for? What was mummification?
- Research someone we have looked at in other lessons, you could look at; Artist - George Seurat or Vincent Van Gogh. Authors - Caroline Binch

OR choose someone of your own choice ©

French:

Use Linguascope and BBC Bitesize to help you. Practise topics that we've already done in class.

• Can you write down French words and write down how you pronounce it. Exam

ple:	un	'uh'
	deux	'dur'
	trois	'twa'

- Try teaching someone in your house some new words. Become the teacher, you could teach someone with a song/rhyme.
- Practise some of the French songs from our last topic: Numbers: https://www.youtube.com/watch?v=lsc3qLMaCu8 https://www.youtube.com/watch?v=evDuqXTfhkA
