

## Lesson 1

L.O I am learning to find angles in a triangle (special cases)

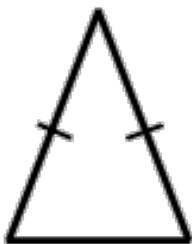

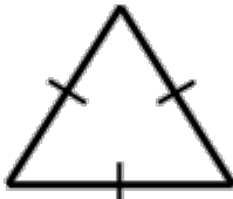

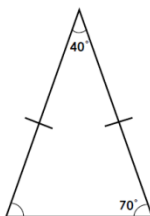

<b>All</b>	All of you <b>must</b> complete the <b>fluency</b> section.
<b>Most</b>	Most of you <b>will</b> complete the <b>fluency</b> and <b>reasoning</b> sections.
<b>Some</b>	Some of you <b>will</b> complete the <b>fluency</b> , <b>reasoning</b> , and <b>problem-solving</b> sections.

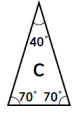

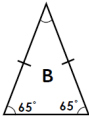

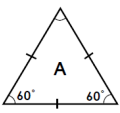

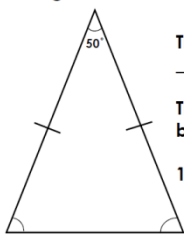

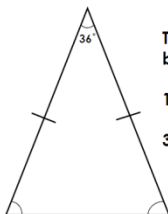

Try your best – it is all we can ask for! 😊

This video may help if you are stuck at any point:

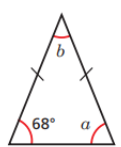

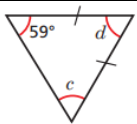

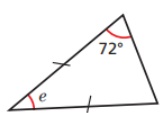

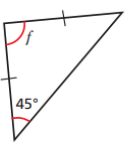

<https://corbettmaths.com/2012/08/10/angles-in-a-triangle/>

### Fluency

Key vocabulary: Angles, triangle, degrees, isosceles, scalene, equilateral, interior, hash marks and right angle.	Your answer
<p><b>Fill in the missing gaps</b></p> <p>There are _____ interior angles in a triangle. All angles in a triangle have a total sum of _____ degrees.</p>	
<p><b>What type of triangle is this? Explain how you know.</b></p> 	
<p><b>What type of triangle is this? Explain how you know.</b></p> 	
<p><b>What type of triangle is this? Explain how you know.</b></p> 	
<p><b>3a. Fill in the missing details about this triangle.</b></p>  <p>This is an _____ triangle.</p> <p>The missing angle is _____ degrees.</p>	

<p>5a. Match each triangle to the best description.</p> <p>1. This triangle has a missing 50 degree angle marking.</p> <p>2. This triangle is missing equal length side markings.</p> <p>3. This triangle is missing a 60 degree angle marking.</p> <div></div>	<p>Match the description to the lettered shape.</p> <p>1 =</p> <p>2=</p> <p>3=</p>
<p>6b. Fill in the missing details about this triangle.</p> <div></div> <p>This triangle has _____ equal sides.</p> <p>The missing angles are both _____ degrees.</p> <p><math>180 = 50 + \_\_\_ + \_\_\_</math></p>	
<p>9b. Fill in the missing details about this triangle.</p> <div></div> <p>The missing angles are both _____ degrees.</p> <p><math>180 = 36 + \_\_\_ + \_\_\_</math></p> <p><math>36 + \_\_\_ + \_\_\_ = 180</math></p>	

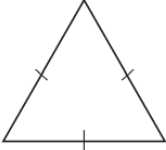

Reasoning

Key vocabulary: Angles, triangle, degrees, isosceles, scalene, equilateral, interior, hash marks and right angle.		Your answer	
<p>a)</p> <div></div> <p>a = <input type="text"/>    b = <input type="text"/></p>		a=	b=
<div></div> <p>c = <input type="text"/>    d = <input type="text"/></p>		c=	d=
<p>c)</p> <div></div> <p>e = <input type="text"/></p>		e=	
<p>d)</p> <div></div> <p>f = <input type="text"/></p>		f=	

## Problem Solving

Key vocabulary: Angles, triangle, degrees, isosceles, scalene, equilateral, interior, hash marks and right angle.	Your answer
<p>An isosceles triangle has one angle of <u>84°</u>.</p> <p>Write down the possible size of the other two angles in the triangle.</p>	<p>Pair 1 ..... and ..... degrees</p>
<p>7b. Aisha says,</p> <div data-bbox="137 607 564 779" style="border: 1px solid black; border-radius: 15px; padding: 10px; margin: 10px 0;"> <p>I have drawn an isosceles triangle. The angles are 45 degrees, 45 degrees and 80 degrees. It has 2 equal length sides and one shorter side</p> </div> <p>Could she be correct? Explain why or why not.</p>	

## Extension

Key vocabulary: Angles, degrees, isosceles, scalene, equilateral, interior, hash marks and right angle.	Your answer
<p>Whitney and Jack are working out the angles in this triangle.</p> <div data-bbox="124 1182 657 1496" style="text-align: center;"> <div data-bbox="140 1182 392 1330" style="border: 1px solid blue; border-radius: 50%; padding: 10px; display: inline-block;"> <p>I can't work out the angles in this triangle because I don't know any of them.</p> </div>  <div data-bbox="352 1346 555 1447" style="border: 1px solid blue; border-radius: 50%; padding: 10px; display: inline-block;"> <p>I know the size of all the angles in this triangle.</p> </div> </div> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div data-bbox="124 1317 252 1420" style="text-align: center;">   <span>Whitney</span> </div> <div data-bbox="568 1384 657 1496" style="text-align: center;">   <span>Jack</span> </div> </div> <p>Explain how Jack would know the angles in this triangle.</p>
